

# UNNATURAL CAUSES

...is inequality making us sick?

## A LUNCHTIME SUMMER FILM SERIES hosted by the Mary Black Foundation

Please join the Foundation for a film series examining the root causes of our alarming socio-economic and racial inequities in health.

The six segment series crisscrosses the nation uncovering startling new findings that suggest there is much more to our health than bad habits, health care, or unlucky genes.

Evidence suggests that more equitable social policies, secure living-wage jobs, affordable housing, racial justice, good schools, community empowerment, and family supports are health issues just as critical as diet, tobacco use, and exercise.

You do not need to attend every film to understand the series - all films touch on different issues of health and inequity. Each film lasts 30 minutes, with a 30 minute discussion period following the screening. All films fall on Wednesday.

**June 24:** *When the Bough Breaks: Exploring racism and birth outcomes*

**July 8:** *Becoming American: Latino immigrants' health in the US*
